

A Warping Mill of Distinction

Why spend time using a warping board when Dazzler's Best Warping Mill can make quick work of a time-consuming job?

Easy on the arms and shoulders, the mill warps 18+ yards. Custom made from clear, select solid wood, hand waxed and buffed to a beautiful smooth, satiny finish. Custom stains and woods available. Measurements: 36"L x 11"W x 21"H

Spinners

Let me introduce to you "The Wacky Vollmecke."

My invention allows you to set the twist on your plied yarn in about 1 hr.

This replaces the Niddy Noddy and Swift.

Take the plied yarn spool directly off your spinning wheel, placing it on the Wacky Vollmecke.

Set the twist with a garment steamer, as you wind it into a skein. I have added a counter that gives you the yardage directly from your spinning. Now you can wind into a ball, or take off on a skein. Skein measure is 2 yards.

The Wacky Vollmecke is affordable, durable and totally unique. Call or email John Vollmecke 719-275-0229 or alpaca@q.com

The Alpaca Nest.

It is a refillable device made of green garland shaped into a ball, which holds the alpaca fiber. Completely refillable, and convenient for the birds of all species, this item blends into the natural environment, and helps our feathered friends build the nests. For added bling a small clay birds head was added, complete with a crystal 'drop.' Hang these nests outside your house and watch the flurry of activity as the birds snatch the fiber for their nests.

Each nest includes refill for \$9.95.
